

Quick user guide

How to download the

MyPestGuide® Reporter app
to your device

1. Search for the MyPestGuide® Reporter app.
2. Get and install the app.
3. Open the app and make a report.

Your reports matter!

Share what you find with biosecurity experts by following these easy steps:

1. Open the MyPestGuide® Reporter app, tap + to make a new report.
2. Attach 4 clear photos. See photo tips below.
3. Select the relevant project (e.g. Biosecurity Blitz).
4. Tell us what you found (i.e. peach tree with curling leaves).
5. Submit your report. Follow the prompts and hang tight – our experts will be in touch soon.

How to take good photos

Capturing the finer details of pests can unlock clues to help identify them. With a bit of patience and a few tips, you'll be snapping macro shots in no time. Here's how to get started:

1. **Camera set up:** If available, use 'macro' mode on your smartphone. You can also use a tripod or a phone clip-on macro lens to reveal amazing features.
2. **Take photos during the day** – the morning or late afternoon are best.
3. **Move slowly, get low** – keep your shadow small to avoid startling your subject.
4. **Take multiple shots** from different angles, attach the best ones.
